

Haniya Jaffar

Full Stack Developer

+92 3214667402 | hanial51706@gmail.com | Lahore, Pakistan | [in](#)

SUMMARY

Driven Computer Science student with hands-on experience in C, C++, Python, and Java, and a solid foundation in software engineering. Strong in problem-solving, communication, and teamwork, with familiarity in Node.js, Electron, and SQL. Eager to contribute to dynamic teams while growing in a professional environment.

EDUCATION

- **FAST - National University of Computer and Emerging Sciences** 2022 - 2026
Bachelor of Computer Science
 - **Coursework:** Web Programming, Software Engineering, Software Design and Analysis, Artificial Intelligence, Computer Networks, and Advanced Database

EXPERIENCE

- **Frontend Development Intern** Oct 2025 – Jan 2026
Aortem.io
 - Developed responsive cross-platform UIs in Flutter and Dart, integrating APIs and conducting QA to improve product quality across iOS and Android.
 - Worked in agile sprints with team, ensuring timely feature delivery and effective cross-team communication.
- **Web Development Intern** July 2025 – Oct 2025
GAO Tek
 - Built and customised WordPress sites with responsive, accessible pages for clients — improving user experience and cross-browser compatibility.
 - Collaborated effectively in a distributed international team, consistently meeting deadlines and communicating progress with clarity.
- **Software Engineering Intern** July 2024 – Nov 2024
Analyzinn Solutions
 - Contributed across the SDLC with strong documentation and data confidentiality practices; recognized by management for initiative, professionalism, and high-quality work.

PROJECTS

- **Final Year Project - FurryCare | AI-Powered Dog Health Diagnostic Mobile App** Aug 2025 – Present
Python, React.js, Node.js, JavaScript, HTML/CSS, AI Chatbot
 - Mobile app for dog owners to diagnose illnesses by uploading photos, describing symptoms, or chatting with an AI for personalized treatment suggestions.
 - Implemented dog profiles (breed, age, medical history) for context-aware, personalized recommendations.
 - Designed an emergency feature to locate vets, provide first-aid guidance, and notify trusted contacts in critical situations.
- **E-Commerce Platform**
Java, HTML/CSS, SQL
 - Built a full-stack e-commerce web app with user authentication, product catalog, cart, and order tracking.
 - Integrated a MySQL backend for efficient data management and seamless user experience.
- **E-Library Desktop App**
NodeJS and Electron
 - Built a cross-platform desktop app to manage digital book collections.
 - Implemented search functionality, book lending/return management, and administrative control features.
- **Flight Booking System**
C++ and SQL
 - Developed an end-to-end airline reservation system with seat selection and dynamic pricing.
 - Implemented full booking history management using a database backend with secure and persistent data storage.

SKILLS

- **Frontend:** React.js, Flutter, HTML/CSS, JavaScript
- **Backend:** Node.js, Python, Java, C++, SQL, MySQL, WordPress
- **Version Control & Tools:** Git, GitHub, Agile development, Project collaboration
